- ReactJS
- JavaScript
- Responsive
- Angular
- Git / SVN
- MySQL
- Python

EDUCATION

Hồ Chí Minh City University of Technology and Education

Major: Computer Engineering Technology

2019 - 2023 (expected) | GPA: 7.23 | Scoreboard (Click here for more details!)

EXPERIENCE

● Frontend Developer - Fresher

Company: IVC - ISB Vietnam

Time: From 05/2023 to 07/2023

Project: Build Renewable Energy Solution Group Control Management Program

Members: 5

Technologies: Angular, Angular Material UI, Jasmine/Karma, SonarQube.

Description: The application builds a renewable energy solution group control management for an electronics corporation customer. The core principle of this application is validate users information and policy information, minimize time spent on user input, auto-populate Information from different systems, generate reports, data visualization and CRUD data.

Responsibilities:

- Built the change data screen page.
- Built the data filter function.
- Developed functions for searching, adding, deleting and editing data in the table.
- Created the policy notification dialog.
- Utilized SVN for version control and Redmine for defect tracking.
- Employed Jasmine / Karma for unit testing.
- Extensively worked with version control systems like Subversion (SVN) and Gitlab (CI/CD).
- Collaborated with CSS3 and Material UI to design responsive web interfaces for multiple departments/pages.
- Participate in the debugging process and improve code quality by fixing issues discovered in SonarQube.

● Frontend Developer - Intern

Company: OneTech Asia Joint Stock (OneTech Asia)

Time: From 07/2022 to 01/2023

Main task:

- Cut interface HTML/CSS from layout files Adobe Photoshop, Adobe XD. Cross-browser support, SEO optimized and responsive.
- Working with Back-end team to support dynamic data dump.
- Writing application interface codes using JavaScript following ReactJs workflows.
- Building reusable components and front-end libraries: login, form,...

CERTIFICATES

English 459 CEFR B2 by British Council
